

ARPAV - Regional Agency for Environmental Protection and Prevention of Veneto

INSTITUTIONAL PROFILE

ARPAV is a public body founded in 1996. The goal of the Agency is to control and preserve the environment in order to help the identification and elimination of risks to humans and to the environment. Its principal activities are:

- Controlling of the environment including sources of pollution (e.g. industrial emissions, waste, radiation);
- Monitoring of the state of the environment, particularly the quality of air, water, and soil;
- Preventing risk factors and promoting an education aimed at favouring life styles, which respect the environment.

ARPAV coordinates its activities closely with others Public Bodies and Private Organisations in order to complete its tasks for the interest of whole society, having developed a large and structured network. To this end, in order to develop also on international landscape those expertises, exchanging best practices as well as learning and giving international lessons, ARPAV is constantly partner and leader within several international projects, summarised here below. Nevertheless the following list of projects also contains some national or regional level experiences that is worth referring considered their scientific and economic value.

WECAREMED ToWards thE CARbon offsEtting in MED (Interreg MED 2014- 2020)	WECAREMED will develop an integrated tool for MED projects that combines: 1. the estimation of GHG emissions generated by ETC project activities (the Carbon Footprint) 2. guidelines to reduce carbon emissions 'at source' 3. the identification of offset measures to compensate carbon emissions 4. the evaluation of costs of mitigation measures (costs plan). WECAREMED tool is not only committed to the Climate Action Goal but, with its specific subsection for guiding in finding solutions within a short scale, it also enhances social and environmental benefits for the local communities of the MED territory.	2021	2022	Overall: 476.000,00 € Arpav: 88.700,00 €	Lead partner	USE - University of Seville – Energy engineering department UNIPD - CRIEP - University of Padua - Interuniversity research centre of public economics AUTH – Aristotle University of Thessaloniki - School of Physics

ADRIA CLIM Climate Change information, monitoring and management tools for adaptation strategies in Adriatic coastal areas (Interreg Italy - Croatia 2014-2020)	AdriaClim is dedicated to supporting the development of science-based regional and local climate change adaptation plans. AdriaClim will address climate change threats by developing regional and local adaptation plans based on up-to-date meteorological and oceanographic information acquired through newly implemented observing and modeling systems for the Adriatic Sea.	2020	2022	Overall: 8.823.415,00 € Arpav: 602.410,00 €	Partner	Regional Agency For Prevention, Environment And Energy In Emilia Romagna (Lead Partner) (It) National Research Council (Cnr) (It) Cmcc - Euro-Mediterranean Center On Climate Change Foundation (It) Apulia Region (It) Alma Mater Studiorum - University Of Bologna (It) Environmental Protection Agency Of Friuli Venezia Giulia (It) Ispra - Italian National Institute For Environmental Protection And Research (It) Marche Region – Productive Activities, Education And Labour (It) Local Health Authority Nr 3 (It) Molise Region (It) Emilia-Romagna Region (It) City Of Venice (It) Zadar County Development Agency Zadra Nova (Hr) Dubrovnik Neretva County (Hr) Ruder Boskovic Institute (Hr) Rera Split - Dalmatia County (Hr) Izor Institute Of Oceanography And Fisheries (Hr) Region Of Istria – Administrative Department For Sustainable Development (Hr)

MARLESS MARine Litter cross-border awareness and innovation actions (Interreg Italy - Croatia 2014-2020)	<p>The general objective of the project is to implement concrete and joint interventions that allow to address the phenomenon of marine Litter from different points of view and methods of intervention. The project therefore puts into effect concrete actions of monitoring, management, prevention and removal of the marine litter without neglecting the normative aspect within which these actions are framed. Finally, it proposes innovative and experimental actions aimed at treating plastic waste in a circular economy perspective.</p>	2020	2022	Overall: 4.244.726,00 € Arpav: 646.240,00	Lead Partner	Ministry of Environment and Energy (HR) DUNEA – Regional Development Agency Bubrovačko-Neretvanske Županije (HR) Cetacea Foundation (IT) University of Dubrovnik (HR) University of Bologna (IT) Institut Ruder Boskovic (HR) IRENA – Istrian Regional Energy Agency L.T.D. TRANSALP Transboundary Storm Risk and Impact Assessment in Alpine Regions (UCPM – 2020 – PP – AG)	TRANSALP aims to develop an integrated methodology for the assessment of the risk deriving from important thunderstorms, storms, in the alpine environment. Initially, all the approaches existing today for the multi-risk assessment of landslides and avalanches, linked to the destruction of vegetation by the wind, will be studied. The main objective would be to develop modern decision-making processes for the prevention of the risk of natural disasters in the mountain areas of the European Union and to promote common standards of civil protection interventions among member countries. Finally, a forecast scale of the intensity of the winds will be determined for the purposes of the civil protection alert.	2021	2022	Overall: 590.347,89 € Arpav: 101.429,58 €	Partner	EURAC – European Accademy of Bolzen (Lead Partner) (IT) EPC – European Project Consulting (IT) BFW – Austrian Federal Center for Forestry Research (AT) ZAMG – Austrian National Metereological and Geophysic service (AT)

INADEF Innovative early-warning system for debris flow based on nowcasting and events (INTERREG Italy - Austria)	INADEF aims at providing an early-warning system that increases the alert time. The proposed system is based on a models cascade: nowcasting, hydrological and triggering models. This new system will be tested by monitoring stations in sites frequently subject to debris flows in all the regions	2019	2022	Overall: 869.122,70 € Arpav: 210.500,00 €	Partner	UNIUD - University of Udine - DI4A Department (Lead Partner) (IT) UNIPD - University of Padova – TESAF Department (IT) BFW – Austrian Research Centre for Forests (AT) ZAMG – National Weather and Geophysical Service of Austria (AT)
RE think WASTE Rethinking municipal tariff systems to improve urban waste governance (LIFE PLUS 2014-2020)	The project envisages equipping Public Administrations with a system to improve separate collection and recycling through the combined action of a tariff based on the precise measurement of waste and adequate information to citizens. This could have important effects on municipal waste management such as increasing separate waste collection, reducing residual waste per capita and increasing the recovery rate, while reducing the average household waste bill.	2019	2022	Overall: 2.764.715,00 € Arpav: 135.266,00 €	Partner	ETRA s.p.a Bassano del Grappa (VI) (Lead Partner) ((IT) O LCA consultants ApS (2.-0 LCA) (Danimarca) Association des villes et régions pour la gestion durable des Ressources (ACR+) (Belgio) Agència de Residus de Catalunya (ARC) (Spagna) ARS ambiente srl (IT) Assemblea Territoriale d'Ambito ATO 2 Ancona (ATA) (IT) Comune di Bitetto (IT) Istituto per la Finanza e l'Economia Locale (IFEL) (IT) Ajuntament Sant Just Desvern (SAN JUST) (SPAGNA) Comune di Varese (IT)

ECO – ALPS WATER Innovative ecological evaluation and management strategies for lake and river ecosystems in the alpine space (INTERREG Alpine Space)	<p>The main objective of Eco-AlpsWater is to integrate traditional water monitoring approaches used in the Alpine region with advanced and innovative technologies, through the use of Next Generation Sequencing (NGS) techniques to analyse environmental DNA (eDNA) extracted from collected water samples. These new techniques allow a rapid and low cost identification of aquatic organisms, from bacteria to fish, for the evaluation of hundreds of samples on more than 50 water bodies and will allow one of the most extensive censuses of lake and river biodiversity in the Alpine region. The data will make it possible to identify the areas most at risk for the presence of toxic cyanobacteria, pathogenic bacteria, and invasive or potentially invasive organisms.</p>	2018	2021	Total budget: 1.804.494,95 € Arpav: 121.701,60 €	Partner	Fondazione Mach -FEM (Lead Partner) ((IT) Istituto Superiore per la Protezione e la Ricerca Ambientale – ISPRA (IT) Leopold-Franzens Universität Innsbruck - LFUI (AT) National Institute of Biology – NIB (SI) Slovenian Environment Agency – ARSO (SI) National Institute for Agricultural Research - INRA (FR) Bavarian State Research Center for Agriculture - LfL (DE) Austrian Agency for Health and Food Safety – AGES (AT) Bavarian Environment Agency - LFU (DE) The French Biodiversity Agency - AFB (FR) University of Applied Sciences and Arts of Southern Switzerland - SUPSI (CH)

ALP WATER SCARCE Water Management Strategies against Water Scarcity in the Alps (APINE SPACE Programme)	<p>It is expected that in future, even the water-rich Alps, in particular the southern Alps, will be affected by severe droughts due to climate change. Increasing anthropogenic water abstraction (for energy, cooling, irrigation, tourism and artificial snow) will exacerbate the water scarcity problem. The project will investigate this matter and will try to propose new strategic approaches and solutions (multifunctional water use and reuse, land use change, artificial groundwater recharge, etc.).</p>	2008	2011	Overall € 3.990.903,00 Arpav € 201.200,00	Partner	Institute de la montagne, Universite' de Savoie (France) (Leader) Societé Economique Alpestre (France) Conseil Generale de la Savoie (France) Amt der Kaernter Landesregierung (Austria) Amt der Steiermaerkischen Landesregierung (Austria) Paris Lodron Universitaet Salzburg Zentrum fuer Geoinformatik (Austria) Bundesanstalt fuer Agrarwirtschaft (Austria) GAL Appennino genovese (Italy) Province of Alessandria (Italy) Province of Trento - Dipartimento Urbanistica e Ambiente (Italy) UNCEM Delegazione Piemonte (Italy) ARPAV - DRST (Italy) Geoloski Zavod Slovenije (Slovenia) Nacionalni Institut za Biologijo, Ljubljana (Slovenia) Kmetijsko Gozdarska zbornica slovenije, Maribor (Slovenia) Eidgenoessische Anstalt fue Wasserversorgung, Abwasserreinigung und Gewaesserschutz (Switzerland) Bundesamt fuer Umwelt BAFU (Switzerland)
